Trigonometry with Corequisite Support: A Targeted Review | Table of Contents

Chapter 1: Angles and Right Triangle Trigonometry

1.1 Vocabulary of Angles and Triangles
- Types of Angles
  - Identify right, acute, obtuse, and straight angles
  - Understand supplementary and complementary angles
- Angles, Triangles, and the Pythagorean Theorem
  - Find the measures of angles of a triangle using properties
  - Use properties of similar triangles to solve for a missing side
  - Use the Pythagorean theorem

1.2 Angles as Rotations and Arc Length
- Angles as Rotations and Radian Measures
  - Identify the measure of positive and negative angles in standard position and the quadrant of the terminal side
  - Convert between degree and radian measure of an angle
  - Understand when two angles are coterminal
- Arc Length and Area of a Sector
  - Find the length of an arc
  - Find the area of a sector of a circle
  - Understand the relationship between linear and angular speed

1.3 Right Triangle Trigonometry
- The Six Trigonometric Ratios
  - Use right triangles to evaluate sine, cosine, and tangent functions
  - Evaluate reciprocal trigonometric functions using right triangles for a sine, cosine, or tangent function
  - Evaluate trigonometric functions of angles not in standard position
- Use Right Triangle Trigonometry in Solving Problems
  - Find missing side lengths using trig ratios
  - Use right triangle trigonometry to solve applied problems

Chapter 2: The Unit Circle

2.1 Sine and Cosine
- Sine and Cosine Values
  - Understand sine and cosine values on the unit circle
  - Find exact sine and cosine values for angles in the first quadrant of the unit circle

2.2 Reference Angles
- Sine and Cosine Values with Reference Angles
  - Find the reference angle for a given angle
  - Use reference angles to evaluate sine and cosine functions
  - Use reference angles to find coordinates on the unit circle
  - Evaluate sine and cosine functions with a calculator

2.3 The Other Trigonometric Functions
- The Other Trigonometric Ratios on the Unit Circle
- Find the secant, cosecant, tangent, and cotangent values for angles in the first quadrant of the unit circle
- Use reference angles to evaluate secant, cosecant, tangent, and cotangent functions
- Evaluate trigonometric functions with a calculator
- Use Given Trigonometric Ratios to Find Other Ratios
  - Understand the relationship between the quadrant in which an angle falls and the signs of the trig functions of that angle
  - Use the Pythagorean identity
  - Find the values of all trigonometric functions given coordinates on a unit circle
  - Find the values of all trigonometric functions given the value of one trigonometric function

Chapter 3: Periodic Functions
3.1 Sine and Cosine Graphs
- Characteristics of Sine and Cosine Graphs
  - Graph the sine function and understand its properties
  - Graph the cosine function and understand its properties
- Transformations of Sine and Cosine Graphs
  - Determine the period and amplitude of a sinusoidal function
  - Determine the phase shift and vertical shift of a sinusoidal function
- Graph Sine and Cosine Functions
  - Find the equation of a sinusoidal function given a graph
  - Find the graph of a sinusoidal function given equation
  - Use sinusoidal functions to solve real-world applications

3.2 Graphs of Other Trigonometric Functions
- Characteristics of Tangent and Cotangent Graphs
  - Graph tangent functions
  - Graph cotangent functions
- Transformations of Tangent and Cotangent Functions
  - Graph tangent or cotangent functions over different periods
  - Graph transformations of tangent and cotangent functions
- Characteristics of Secant and Cosecant Graphs
  - Graph cosecant functions
  - Graph secant functions
- Transformations of Secant and Cosecant Functions
  - Graph transformations of cosecant functions
  - Graph transformations of secant functions
  - Find the equation of a cosecant function from a graph
  - Find the equation of a secant function from a graph

3.3 Inverse Trigonometric Functions
- Introduction to Inverse Trigonometric Functions
  - Understand inverse sine, cosine, and tangent functions
  - Understand inverse secant, cosecant, and cotangent functions
  - Use a calculator to evaluate inverse trigonometric functions
- Solve Triangles with Inverse Trigonometric Functions
• Find an angle given two sides of a right triangle
• Solve right triangle problems
• Compose Functions with Inverse Trigonometric Functions
  • Evaluate composite functions with inverse trigonometric functions in the form f(f^{-1}(x)) or f(g^{-1}(x))
  • Evaluate composite functions with inverse trigonometric functions in the form f^{-1}(f(x)) or f^{-1}(g(x))

Chapter 4: Trigonometric Identities and Equations
4.1 Fundamental Trigonometric Identities
• Simplify Expressions with Basic Trigonometric Identities
  • Understand quotient and reciprocal identities
  • Use even and odd identities in simplifying trigonometric expressions
• Use Pythagorean and Cofunction Identities
  • Understand all forms of the pythagorean identity
  • Use the cofunction identities
• Verify Trigonometric Identities
  • Use all identities to simplify trigonometric expressions
  • Use algebraic techniques to simplify trigonometric expressions
4.2 Sum and Difference Identities
• Sum and Difference Formulas
  • Use the sum and difference formula for cosine
  • Use the sum and difference formula for sine
  • Use the sum and difference formula for tangent
  • Use the sum and difference formulas to simplify trigonometric expressions
4.3 Double-Angle, Half-Angle, and Reduction Formulas
• Double-Angle Formulas
  • Use double-angle formulas to find values of trigonometric functions
  • Use double-angle formulas to simplify trigonometric expressions
• Half-Angle and Power-Reduction Formulas
  • Use reduction formulas to simplify an expression
  • Use half-angle formulas to find values of trigonometric functions
4.4 Sum-to-Product and Product-to-Sum Formulas
• Sum-to-Product and Product-to-Sum Formulas
  • Express the product of trigonometric functions as a sum
  • Express sums of trigonometric functions as a product
4.5 Trigonometric Equations
• Trigonometric Equations in Sine and Cosine
  • Solve linear trigonometric equations in sine
  • Solve linear trigonometric equations in cosine
• Trigonometric Equations Involving a Single Trigonometric Function
  • Solve linear trigonometric equations in secant and cosecant
  • Solve linear trigonometric equations in tangent and cotangent
  • Solve trigonometric equations using a calculator
• Trigonometric Equations in Quadratic Form or Requiring Factoring
- Solve equations with a single trigonometric function
- Solve factorable trigonometric equations in quadratic form
- Solve trigonometric equations in quadratic form requiring the quadratic formula
- Trigonometric Equations Requiring Identities or Multiple Angles
  - Solve trigonometric equations using fundamental identities
  - Solve trigonometric equations with multiple angles
  - Solve trigonometric equations using cofunction identities

Chapter 5: Further Applications of Trigonometry
5.1 Non-right Triangles - Law of Sines
  - Law of Sines
    - Use the law of sines to solve ASA or AAS triangles
    - Use the law of sines to solve SSA triangles
    - Solve applied problems with the law of sines

5.2 Non-right Triangles - Law of Cosines and Area of Oblique Triangles
  - Law of Cosines
    - Use the law of cosines to solve SAS triangles
    - Use the law of cosines to solve SSS triangles
    - Solve applied problems with the law of cosines
  - Area of Oblique Triangles
    - Find the area of an oblique triangle using the sine function
    - Use Heron’s formula to find the area of a triangle

5.3 Polar Coordinates
  - Convert Coordinates Between Rectangular and Polar Forms
    - Plot points using polar coordinates
    - Convert from polar coordinates to rectangular coordinates
    - Convert from rectangular coordinates to polar coordinates
  - Convert Equations Between Rectangular and Polar Forms
    - Write a cartesian equation in polar form
    - Write a polar equation in cartesian form

5.4 Graphs in Polar Coordinates
  - Introduction to Graphing Polar Equations
    - Test a polar equation for symmetry
    - Find zeros and maximum values for a polar equation and graph polar equations by plotting points
    - Graph a circle or a line from a polar equation
  - Graph Classic Polar Curves
    - Graph a cardioid from a polar equation
    - Graph a limacon from a polar equation
    - Graph a lemniscate from a polar equation
    - Graph a rose curve from a polar equation

5.5 Polar Form of Complex Numbers
  - Write Complex Numbers in Polar Form
    - Plot complex numbers
    - Find the absolute value of a complex number
• Write complex numbers in polar form
• Convert a complex number from polar to rectangular form
• Product and Quotient of Complex Numbers in Polar Form
  • Find the product of complex numbers in polar form
  • Find the quotient of complex numbers in polar form
• Powers and Roots of Complex Numbers in Polar Form
  • Find powers of complex numbers in polar form
  • Find roots of complex numbers in polar form

5.6 Parametric Equations
• Write Parametric Equations
  • Parameterize a curve
  • Find the parametric equations for a line segment given an orientation
• Eliminate the Parameter
  • Eliminate the parameter in linear equations
  • Eliminate the parameter in polynomial and radical equations
  • Eliminate the parameter in exponential and logarithmic equations
  • Eliminate the parameter in trigonometric parametric equations

5.7 Graphs with Parametric Equations
• Graph Parametric Equations
  • Graph parametric equations by plotting points
  • Graph trigonometric parametric equations by plotting points
  • Use parametric equations in applications

5.8 Vectors
• Properties of Vectors
  • Understand properties of vectors and find the position vector
  • Find magnitude and direction of a vector
• Vector Addition and Scalar Multiplication
  • Add or subtract vectors
  • Multiply a vector by a scalar
  • Use vector addition and scalar multiplication to find a new vector
• The Unit Vector
  • Write a vector in terms of i and j
  • Find the unit vector
  • Perform operations on vectors in terms of i and j
  • Write a vector in terms of magnitude and direction
• The Dot Product and Vector Applications
  • Find the dot product of two vectors
  • Find the angle between two vectors
  • Use vectors in applications

Corequisite Support: A Targeted Review

Chapter 1: Foundations
1.1 Use the Language of Algebra
• Prime Factorizations, Algebraic Symbols, and Order of Operations
  • Find factors, prime factorizations, and least common multiples
  • Use algebraic symbols and variables
  • Simplify expressions with grouping symbols and exponents using order of operations
• Simplifying and Rewriting Algebraic Expressions
  • Evaluate an expression involving exponents and order of operations
  • Identify and combine like terms
  • Translate an English phrase and word problems into an algebraic expression

1.2 Integers
• Absolute Value and Operations on Integers
  • Understand absolute value and simplify expressions involving absolute value with order of operations
  • Add and subtract integers
  • Multiply and divide integers
• Algebraic Expressions with Integers
  • Simplify expressions with integers
  • Evaluate variable expressions with integers
  • Translate an English phrase and word problems involving integers into an algebraic expression

1.3 Fractions
• Operations on Fractions
  • Simplify fractions
  • Multiply and divide fractions
  • Add and subtract fractions
• Algebraic Expressions with Fractions
  • Evaluate variable expressions involving fractions
  • Use the order of operations to simplify fractions

1.4 Decimals
• Operations on Decimals and Understanding Percents
  • Name and round decimals
  • Evaluate expressions by adding and subtracting decimals
  • Multiply and divide decimals
  • Convert between decimals, fractions, and percents
• Square Roots and the Real Number System
  • Evaluate square roots - IA
  • Identify integers, rational numbers, irrational numbers, and real numbers
  • Locate fractions and decimals on the number line

1.5 Properties of Real Numbers
• Using the Properties of Real Numbers
  • Understand and use the commutative and associative properties
  • Use the properties of identity, inverse, and zero
  • Simplify an expression using the distributive property

Chapter 2: Solving Linear Equations
2.1 Use a General Strategy to Solve Linear Equations

- Solving Linear Equations in One Variable
  - Determine if a value is the solution to an equation
  - Use a general strategy to solve a linear equation
  - Determine if an equation is a contradiction, identity, or conditional equation
- Solving Linear Equations with Fraction and Decimal Coefficients
  - Solve an equation with fractional coefficients
  - Solve an equation with decimal coefficients

2.2 Use a Problem Solving Strategy

- An Introduction to Problem Solving
  - Develop a problem-solving strategy for word problems
  - Solve number word problems
- Literal Equations and Using Formulas with Geometry
  - Solve a formula for a specified variable
  - Use a formula to solve a geometric application
  - Use the Pythagorean theorem - IA

2.3 Solve Linear Inequalities

- Solving Linear Inequalities
  - Graph an inequality on a number line and use interval notation
  - Solve a linear inequality that requires only one step
  - Solve a linear inequality that requires multiple steps to solve
  - Translate words to an inequality and solve applications with linear inequalities

2.4 Solve Compound Inequalities

- Solving Compound Inequalities
  - Solve a compound inequality involving intersections
  - Solve a compound inequality involving unions
  - Solve applications with compound inequalities

2.5 Solve Absolute Value Inequalities

- Solving Absolute Value Equations and Inequalities
  - Solve an absolute value equation
  - Solve an absolute value inequality involving "less than"
  - Solve an absolute value inequality involving "greater than"
  - Solve applications with absolute value

Chapter 3: Graphs and Functions

3.1 Graph Linear Equations in Two Variables

- The Rectangular Coordinate System and Graphing Linear Equations
  - Plot points on the rectangular coordinate system and identify the quadrants of points
  - Understand the relationship between solutions to an equation and points on a graph
  - Graph linear equations by plotting points
  - Graph horizontal and vertical lines
- Graphing Linear Equations with Intercepts
  - Find the intercepts of a line from a graph or an equation
  - Graph a line using intercepts
3.2 Slope of a Line

- The Slope of a Line
  - Find the slope of a line using the relationship between rise and run
  - Find the slope of a line given two points on the line
- Graphing Linear Equations with Slope
  - Graph a line given the slope and a point
  - Identify the slope and intercept of a line from its equation and use it to graph the line
  - Graph a linear equation using a variety of methods
- Applications of Slope and Parallel and Perpendicular Lines
  - Interpret applications using graphs and slope
  - Determine if two lines are parallel or perpendicular by comparing slopes

3.3 Find the Equation of a Line

- Equations of Lines
  - Find the equation of a line given the y-intercept and the slope
  - Find the equation of a line given a point on the line and the slope
  - Find the equation of a line given two points on the line
- Equations of Parallel and Perpendicular Lines
  - Find the equation of a line parallel to a given line
  - Find the equation of a line perpendicular to a given line

3.4 Graph Linear Inequalities in Two Variables

- Graphing Linear Inequalities
  - Verify that a given point is a solution to an inequality in two variables
  - Write a linear inequality given its graph
  - Graph a linear inequality in two variables
  - Solve applications using linear inequalities in two variables

3.5 Relations and Functions

- Introduction to Functions
  - Find the domain and range of a relation
  - Determine if a relation is a function given a set of ordered pairs or a mapping
  - Determine if a relation is a function given an equation
- Function Notation
  - Use function notation to find the value of a function given a number
  - Use function notation to find the value of a function given a variable expression

3.6 Function Graphs and Transformations

- The Vertical Line Test and Graphs of Functions
  - Use the vertical line test to determine if a graph represents a function
  - Identify graphs of basic functions
  - Read information from the graph of a function
- Transformations of Functions
  - Graph functions using vertical and horizontal shifts
  - Graph functions using reflections about the x-axis and the y-axis
  - Graph functions using compressions and stretches
  - Combine transformations
Chapter 4: Systems of Linear Equations

4.1 Solve Systems of Linear Equations with Two Variables

- Solving Systems of Linear Equations in Two Variables by Graphing
  - Determine if an ordered pair is a solution of a system of linear equations
  - Solve systems of linear equations by graphing
  - Identify inconsistent and dependent systems of equations with two variables

- Solving Systems of Linear Equations in Two Variables Algebraically
  - Solve a system of linear equations using the substitution method
  - Solve a system of linear equations using the elimination method
  - Choose the most convenient method to solve a system of linear equations

4.2 Solve Applications with Systems of Equations

- Systems of Linear Equations in Two Variables and Problem Solving
  - Solve applications of uniform motion using systems of equations
  - Solve geometric application problems using systems of equations
  - Solve word problems and applications using a system of linear equations

4.3 Graphing Systems of Linear Inequalities

- Solving Systems of Linear Inequalities
  - Determine if an ordered pair is a solution of a system of linear inequalities
  - Solve systems of linear inequalities by graphing
  - Solve an application using systems of linear inequalities

Chapter 5: Polynomials and Polynomial Functions

5.1 Add and Subtract Polynomials

- Adding and Subtracting Polynomials and Polynomial Functions
  - Determine the degree and type of a given polynomial and write it in standard form
  - Add or subtract polynomial expressions
  - Evaluate a polynomial function for a given value
  - Add or subtract polynomial functions

5.2 Properties of Exponents and Scientific Notation

- Simplifying Expressions with Properties of Exponents and Negative Exponents
  - Use the product property of exponents to simplify expressions
  - Use the quotient property and the zero property of exponents to simplify expressions
  - Rewrite expressions with positive exponents using the definition of negative exponents
  - Use the power property for exponents and extensions to products and quotients to simplify expressions
  - Simplify exponential expressions by combining all properties

- Scientific Notation
  - Convert between decimal notation and scientific notation
  - Multiply and divide expressions given in scientific notation

5.3 Multiplying Polynomials

- Multiplying Polynomials
  - Multiply monomials and multiply a polynomial by a monomial
  - Multiply two binomials
• Multiply a polynomial by a polynomial
• Special Products of Binomials and Multiplying Polynomial Functions
  • Use the binomial squares pattern to square a binomial
  • Use the conjugate pairs pattern to multiply conjugates
  • Multiply polynomial functions

5.4 Greatest Common Factor and Factor by Grouping
• The Greatest Common Factor and Factoring by Grouping
  • Find the greatest common factor of monomial expressions
  • Factor the greatest common factor from polynomial expressions
  • Factor polynomials by grouping

5.5 Factor Trinomials
• Factoring Trinomials
  • Factor a trinomial with a leading coefficient of 1
  • Factor a trinomial with a leading coefficient of greater than 1 using trial and error
  • Factor a trinomial with a leading coefficient of greater than 1 using the 'ac' method
  • Factor a trinomial in a quadratic form using substitution

5.6 Factor Special Products
• Factoring Special Products
  • Factor polynomials using a perfect squares binomial pattern
  • Factor polynomials using a difference of squares pattern
  • Factor a sum or a difference of cubes
  • Factor polynomials by combining the difference of squares and perfect square trinomial patterns

5.7 General Strategy for Factoring Polynomials
• Choosing a Factoring Strategy
  • Use a general strategy for factoring polynomials

5.8 Polynomial Equations
• Solving Polynomial Equations by Factoring
  • Use the zero product property to solve a factored polynomial equation
  • Solve polynomial equations by factoring
  • Find zeros and intercepts of a polynomial function by factoring
  • Use factoring to solve application problems involving polynomial equations

Chapter 6: Rational Expressions and Functions
6.1 Multiply and Divide Rational Expressions
• Domain of Rational Expressions and Simplifying Rational Expressions
  • Determine which values make a rational expression undefined
  • Simplify rational expressions - IA
• Multiplying and Dividing Rational Expressions
  • Multiply two rational expressions
  • Divide rational expressions, including those written as complex fractions
  • Multiply and divide rational functions
6.2 Add and Subtract Rational Expressions
- Adding and Subtracting Rational Expressions
  - Add or subtract rational expressions with a common denominator or with denominators that are opposites
  - Determine the least common denominator of rational expressions
  - Add or subtract rational expressions with unlike denominators
  - Add and subtract rational functions

6.3 Simplify Complex Rational Expressions
- Simplifying Complex Rational Expressions
  - Simplify complex rational expressions by writing the expression as division
  - Simplify complex rational expressions by using the least common denominator

6.4 Solve Rational Equations
- Solving Rational Equations and Using Rational Functions
  - Solve rational equations
  - Use rational equations to find points on the graph of a rational function
  - Rewrite a rational equation in terms of a specific variable

6.5 Solve Applications with Rational Equations
- Proportions and Similar Figures with Rational Equations
  - Solve problems involving proportions
  - Solve application problems involving similar figures
- Uniform Motion, Work, and Problem Solving
  - Use rational equations to solve uniform motion applications
  - Use rational equations to solve problems involving rates of work
- Variation and Problem Solving
  - Solve problems involving direct variation
  - Solve problems involving inverse variation

6.6 Solve Rational Inequalities
- Solving Rational Inequalities
  - Find the solution set of a rational inequality
  - Solve an inequality with rational functions

Chapter 7: Roots and Radicals
7.1 Simplify Expressions with Roots
- Understanding Radical Expressions
  - Estimate and approximate roots
  - Simplify a variable expression with even or odd roots
  - Simplify a numerical expression with even or odd roots

7.2 Simplify Radical Expressions
- Simplifying Radical Expressions
  - Use the product property to simplify radical expressions
  - Use the quotient property to simplify radical expressions

7.3 Simplify Rational Exponents
- Rational Exponents
  - Simplify an expression with rational exponents and a numerator of 1
• Simplify an expression with rational exponents and a numerator greater than 1
• Use the properties of exponents to simplify expressions with rational exponents

7.4 Add, Subtract, and Multiply Radical Expressions
• Operations with Radical Expressions
  • Add and subtract radical expressions
  • Multiply radical expressions
  • Use polynomial multiplication to multiply radical expressions
  • Use special product formulas to multiply radical expressions

7.5 Divide Radical Expressions
• Dividing Radical Expressions and Rationalizing Denominators
  • Divide radical expressions
  • Rationalize a denominator when the denominator is a monomial
  • Rationalize a denominator when the denominator is a binomial

7.6 Solve Radical Equations
• Solving Radical Expressions
  • Solve square root equations containing a single radical
  • Solve a radical equation with a single radical or an equation with a rational exponent
  • Solve a radical equation with two radicals
  • Solve application problems involving radical equations

7.7 Use Radicals in Functions
• Radical Functions
  • Evaluate a radical function - IA
  • Find the domain of a radical function
  • Graph a radical function by plotting points and determine its range

7.8 Use the Complex Number System
• Introduction to Complex Numbers
  • Evaluate the square root of a negative number and understand the complex number system
  • Add or subtract complex numbers
• Multiplying and Dividing Complex Numbers and Powers of i
  • Multiply complex numbers
  • Multiply two complex conjugates
  • Divide complex numbers
  • Simplify powers of i - IA

Chapter 8: Quadratic Equations and Functions
8.1 Solve Quadratic Equations Using the Square Root Property
• Solving Quadratic Equations Using the Square Root Property
  • Solve quadratic equations using the square root property
  • Solve quadratic equations with a binomial as the quadratic term using the square root property

8.2 Solve Quadratic Equations by Completing the Square
• Solving Quadratic Equations by Completing the Square
  • Find the term that completes the square of a quadratic expression
• Solve quadratic equations with a leading coefficient of 1 by completing the square
• Solve quadratic equations with a leading coefficient greater than 1 by completing the square

8.3 Solve Quadratic Equations Using the Quadratic Formula
  • Solving Quadratic Equations Using the Quadratic Formula
  • Solve quadratic equations using the quadratic formula with two real solutions
  • Solve quadratic equations using the quadratic formula with one or no real solutions
  • Determine the number and type of solutions of a quadratic equation by using the discriminant

8.4 Solve Quadratic Equations in Quadratic Form
  • Solving Equations by Using Quadratic Methods
  • Solve an equation in quadratic form by using substitution
  • Solve an equation in quadratic form with rational or negative exponents by using substitution

8.5 Solve Applications of Quadratic Equations
  • Problem Solving with Quadratic Equations
  • Solve an application problem modeled by a quadratic equation
  • Solve a geometric application problem where the quadratic formula may be required

8.6 Graph Quadratic Functions Using Properties
  • Parabolas and Their Properties
    • Graph a quadratic function by plotting points and determine the direction a parabola opens
    • Determine the axis of symmetry and vertex of a parabola given a function
    • Determine the intercepts of a parabola given a function
  • Graphing Quadratic Functions
    • Graph a quadratic function by finding key points
    • Determine the minimum or maximum of a quadratic function and use it in applications

8.7 Graph Quadratic Functions Using Transformations
  • Transformations of Parabolas
    • Graph a quadratic function using a vertical translation
    • Graph a quadratic function using a horizontal translation
    • Graph a quadratic function by compression, stretching, or reflecting
  • Graphing Quadratic Functions Using Transformations
    • Rewrite a quadratic in vertex form and graph it using transformations
    • Find a quadratic function given its graph

8.8 Solve Quadratic Inequalities
  • Solving Quadratic Inequalities
  • Solve a quadratic inequality graphically
  • Solve a quadratic inequality algebraically

Chapter 9: Inverse Functions, Distance and Midpoint Formulas, and Circles

9.1 Finding Composite and Inverse Functions
  • Composite Functions
    • Perform a composition of functions
    • Evaluate a composition of functions for a specific value
• One-to-One Functions
  • Determine whether a function is one-to-one given a set of ordered pairs
  • Use the horizontal line test to determine whether a graph represents a one-to-one function
• Inverse Functions
  • Find the inverse of a function given a set of ordered pairs or a graph
  • Verify that two functions are inverses of each other
  • Find the inverse of a function algebraically
9.2 Distance and Midpoint Formulas and Circles
• The Distance and Midpoint Formulas
  • Use the distance formula to find the distance between two points
  • Use the midpoint formula to find the midpoint between two points
• The Equation of Circles
  • Write the standard form of the equation of a circle given its center and radius
  • Write the standard form of the equation of a circle given its center and a point on the circle
  • Graph a circle given its equation in standard form
  • Rewrite the equation of a circle given in general form by completing the square
